We believe in embracing newness and optimism with appropriate size of furniture, muted colours, textures and prints. Materials on our list include Century veneers and laminates, Olo MDF wave boards and MDF Jaali, Asian Paints, Philips LEDs, furniture from Style Spa and Pepperfry.

Ar. Peeyush Srivastava & Interior Designer Gitanjali Srivastava,
Nexusplus Consultants

When crafting a home, trend will be moving towards fresh, natural materials such as stone, copper, concrete, and granite, which bring an organic and serene ambience to any space. For this year, we are expecting to see more copper accents along with a mixture of other metals. Copper's earthy red and orange tones and warm brass will be subtle alternatives to the expected steel accents. Warmer tones and tonal reds add contrast while providing a sense of warmth in homes.

Though muted colors avoid making spaces feel overwhelming, designers believe that 2019 will be a year of bolder colors and richer hues that will pop up muted furnishings. Geometric, asymmetrical bold patterns, vintage lighting, statement furniture pieces and bold textures will bring comfort as people want soul and grounding in their homes, with artefacts that may even tell a story.
